

## Cellinite BioTabs

RV and boat tablets from Cellinite BioTabs are non-hazardous portable toilet treatments that use an oxygen-delivery system to treat the collection system. The tablet sinks to the tank floor where it creates an environment for bacterial degradation. One application will mitigate noxious odors and break down food and organic waste. Good Sam Club product tester Robert Hirsch of Acton, Massachusetts, says, "After only one use I found that there were no odors rising from the collection system." **Price:** \$9.99 for an eight pack. **Contact:** 781-453-2233, [www.biotabs.net](http://www.biotabs.net) ●
